

Uniseal, Inc. to offer high performance adhesives and sealants to the solar power industry, improving service life, reliability, and efficiency.

Evansville, IN, United States, 9/21/2010 – Uniseal, Incorporated has announced its entry into the Solar Energy field, with its *SolFusion*[™] family of adhesives and sealants for Photovoltaic, Concentrated Photovoltaic, and Concentrated Solar Thermal devices and racking systems.

Brandon Willis, Business Development Manger for Renewable Energy, will lead the company's efforts in bringing advanced products that directly contribute to increased efficiency, improved service life and reliability, and lower cost per watt to the industry.

Randy Zahn, President, stated, "Uniseal is excited to bring its rich history of innovation and unsurpassed quality to the solar industry. Our expertise in the areas of multi-surface bonding adhesion and vapor and moisture sealing along with our state of the art facilities position us well to advance the capabilities of current and future generations of these devices."

Willis noted that Uniseal's extensive history in the automotive sector directly translates to their new market focus stating, "Uniseal has been at the forefront of many manufacturing innovations in the automotive industry, helping the OEM's drive down costs while improving vehicle performance, quality, and safety. Solar firms are looking for similar technical innovations that will help push their technology to the forefront of the industry. We can make a substantial contribution to those goals."

Uniseal *SolFusion*[™] products are available world-wide. The product line includes solutions for the fabrication, assembly, attachment, and installation of crystalline and thin film photovoltaics as well as concentrating PV and solar thermal devices. The company will exhibit at Solar Power International in Los Angeles, October 12-14, Kentia Hall Booth #5718.

About Uniseal, Inc.

Uniseal was founded in 1960 and serves customers and partners in the transportation, industrial, and construction markets. With headquarters in Evansville, Indiana, Uniseal operates globally and is ever expanding their manufacturing and service footprint. As a member of Koch Enterprises, a privately held, Fortune 500 conglomerate, the company is aggressively pursuing advanced technologies to benefit each of its core industries.

SolFusion is a trademark of Uniseal, Incorporated.
