

Uniseal, Inc. announces the opening of its Rétság, Hungary facility, serving its Automotive and Solar customers throughout Europe.

Rétság, Hungary, 7/22/11 – Uniseal, Incorporated has announced today the opening of its European facility servicing its customers and partners throughout Europe. The facility will supply custom formulated adhesives and sealants mainly for the Automotive and Solar industries. “Europe has long been a leader in the production of both automobiles and solar panels. Uniseal is delighted to be able to offer the same innovative products, produced and serviced locally with the same outstanding quality and delivery as our other facilities around the world,” stated Brandon Willis, Director of Marketing & New Business Development.

The European facility will be managed by Martin Breucker, who has taken the role of Chief Operating Officer – European Operations. Martin earned his PhD in Materials Science from the University of Dortmund, Department of Chemical Engineering and has held a variety of technical and general management positions throughout his career. “We are extremely pleased to have Martin at the forefront of our European expansion. With his depth of knowledge and extensive experience, we look forward to an exciting future for Uniseal Hungary,” stated Randy Zahn, President & CEO of Uniseal.

With its unique portfolio of products, Uniseal can help customers improve quality and efficiency while becoming more environmentally friendly through the reduction of volatile organic compounds (VOCs) and other harmful chemicals. “This investment underscores Uniseal’s commitment to its global customers and their operations around the world,” stated Stephani Catt, Executive Vice President & Chief Operating Officer.

About Uniseal, Inc.

Uniseal was founded in 1960 and serves customers and partners in the transportation, solar, industrial, and construction markets. With headquarters in Evansville, Indiana, Uniseal operates globally and is ever expanding their manufacturing and service footprint. As a member of Koch Enterprises, a privately held conglomerate with over 130 years of history, the company is aggressively pursuing advanced technologies to benefit each of its core industries.
